

# Data input

Global mass spectrometry data analyzed by MaxQuant

1

## Data Import

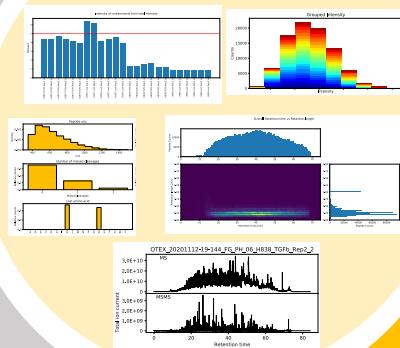

Validation and preparation of:

- Required files
- MaxQuant output tables
- Settings
- Analysis design

2

## Quality Control

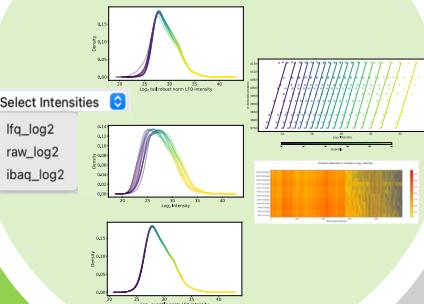

Report of:

- Chromatogram
- Experimental parameters
- Technical parameters

3

## Data Preprocessing

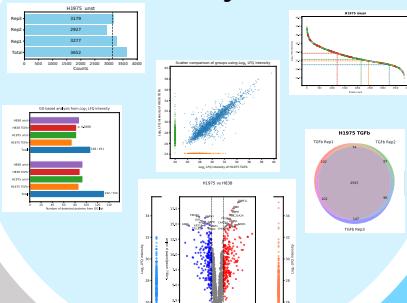

Selection of:

- Intensity type
- Technical replicates
- Normalization

4

## Exploratory Analysis

Creation of:

- Outlier detection and comparison plots
- Statistical inference plots
